Frontend & Mobile Developer | React · React Native · TypeScript

Frontend-focused developer with experience building web and mobile applications using React and React Native. Also developed backend features with Supabase, including authentication, wallet transactions, and savings-group systems. Comfortable working in Agile teams to ship clean, reliable applications.

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML, CSS

Mobile: React Native (Expo)

Backend: Node.js, REST APIs, Supabase, Firebase

Databases: SQL, Firebase Realtime Database

Cloud & DevOps: AWS (EC2, S3), Azure Fundamentals, Docker, Jenkins

Tools: Git, GitHub, VS Code, Agile

RELEVANT EXPERIENCE

Contribiia — Full-Stack Developer (Capstone Project) [\[GitHub\]](#)

Bow Valley College | Jan 2026 – Apr 2026

- Built backend features for a fintech group savings application using Supabase
- Implemented authentication, user profiles, and verification flow
- Developed wallet system supporting deposits, withdrawals, and transfers
- Built club system for creating and managing savings groups
- Integrated secure transactions using RPC functions
- Enforced Row-Level Security (RLS) to protect sensitive financial data
- Collaborated on frontend using React Native to implement UI screens and API integration

Movie App — Full-Stack Developer (Personal Project) [\[GitHub\]](#)

React, TypeScript, Vite, Firebase, OMDb API | 2026

- Built a full-stack movie search app solo using an MVVM architecture to separate services, view-models, and presentational components
- Integrated the OMDb API for live film search with typed responses and readable error handling
- Implemented Firebase Authentication (register, login, logout) with protected routes and redirect logic
- Stored per-user favourites in Firebase Realtime Database, keyed by user ID
- Directed an AI-assisted workflow using small, scoped prompts and reviewed every change before accepting it

Enterprise React App — Docker & Jenkins CI/CD [\[GitHub\]](#)

React, Node.js, Docker, Jenkins, GitHub

- Containerized a React app with Docker and automated build, test, and deployment via a Jenkins CI/CD pipeline
- Built and tested Docker images and contributed to Jenkins pipeline setup and documentation
- Tested the deployment workflow to ensure reliable, repeatable releases

Bow Course Registration — Full-Stack Web Application [\[GitHub\]](#)

Team-Based Academic Project | Bow Valley College

- Designed and developed a full-stack course registration system from scratch
- Built backend services using Node.js and REST APIs
- Designed and queried SQL databases for students, courses, and registrations
- Developed responsive frontend using HTML, CSS, JavaScript, and React
- Used Git/GitHub for version control and team collaboration

Personal Portfolio Website

React, TypeScript, Tailwind CSS

- Built a responsive personal portfolio to showcase projects and skills, deployed to production

EDUCATION

Diploma – Software Development

Bow Valley College, Calgary, Alberta
